

Ground Searching Metal Detector Model: GS108

Ground searching metal detector

Part Feature

Battery case Small detect plate Display

Technical specifications

Power supply: DC 12V

Signal Frequency: 7KHZ

Acoustics Frequency: 400H

Sensitivity: Small detect plate can detect 25-30cm (USD25 sent)

Big detect plate can detect 35-40cm (USD25 sent)

The Detecting Depth (Max): Small detect plate can detect 1.5 meters

Big detect plate can detect 3.0-3.5 meters

(note: the sample object for detecting above is a 60x60x1 CM) aluminum board

Packing dimension: 820(L) X 170(W) X 320(H) mm

Unit weight: 3.2 kg

Gross Weight for a carton: 21.2kgs

Net Weight for a carton: 12.4kgs

Carton Dimension: 680(L) X 340(W) X 845(H) mm

Characteristics

* GS108 metal detector use advanced international technology design, and be made by high quality Components

* High detect depth, exact orientation, strong resolving power and convenient operation made it be popular with customers.

* It can detect and identify the metals under ground

* It has ground balance setting, which will eliminate the affect of "Mineralization reaction".

* It can distinguish ferrous metal and non-ferrous metals

* Adopt intelligent operating system

* Packing with high-strong ABC material, light and long-lived

* You can use earphone to recognize metal sounds

* Military affairs * Security detect

* Public security Criminal sector: Quick search

*Exam metal in the material, fuel and food

* Detect metal in the post and baggage

* Detect the pipeline and cable which under ground

* Archeology and Prospect

Dig out the gold or silver treasure and metal cultural relic.
