

Modern and elegant

Using octagon alloy case, with simple and fashionable model, the white surface adopt our unique static spewing technology and generate good feeling both on hand touching and visual.

Automatically release and stop

Equipped with advanced SR system, on the traditional localizer just has one or two orientations on every circle. We use ball orientation localizer, there are five time orientation on every circle, the user can stop it at anywhere follow their inclinations.

Super enduring power

Adopted large axle, with super maintaining power, ensures the wide screen keep leveling off as the mirror.

Perfect picture quality

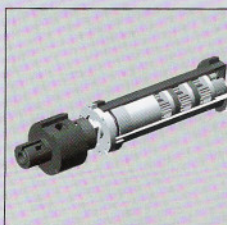

Using the glass beaded and matte white fabric which imported from U S A, the screen offers variety of products suitable for various conditions. The matte white has a broad visual sense and a exquisite and pastel color; the glass beaded with a high luminance shows a clear and colorful picture.

Completely security

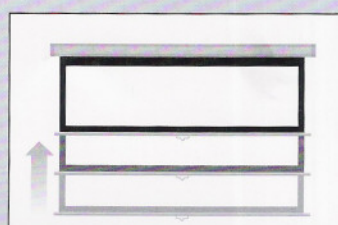

You needn't send it back to the outer case, the screen will ascend automatically and slowly. Reduce the strength of the handle and protect the screen effectively, meanwhile , it can prolong using life-span. Reduce the impacting sound of end-bar and outer case, improve the environment. Prevent the danger when you slip out of your hand carelessly and the screen roll back quickly. Make it more safe and reliable.

● Using octagon alloy case

● Advanced SR system

● Slow return
